EUROPEAN VARIETIES

FURNISHED IN GENEROUS OVERSIZE PACKETS

FROM THE FLOWER GARDENS OF ENGLAND

For generations England has been famous for her flower gardens. It has been there, in England and Scotland, in the wonderful old country estates and public gardens that many of our most choice varieties have been created. It is to the old world gardeners with their patience, enthusiasm and love for their profession that we are indebted for the great advancement in, and perfection of, floriculture today.

ALPINE (Dwarf) PERENNIAL FLOWER SEEDS

For Rock Gardens, Border Edges, Walls, Steps, etc.

Note.—Rare and choice varieties, especially selected, the height in each instance is given in inches. Seed should be sown in coldframes during May–June and the young plants protected during Winter for transplanting outside in early Spring. The raising of these choice Rock Plants from seed is not devoid of care and attention; however, the plants are valuable, and will more than repay for any trouble taken in their cultivation.
